

SYSCLOUD

G SUITE & OFFICE 365 BACKUP FEATURES

G SUITE BACKUP TO KEEP YOUR BUSINESS GOING

Get the SysCloud enterprise-grade backup and the restore solution to secure Gmail, Drive, Contacts, Calendar, and Slides so you can run your business with confidence.

Why should you back up G Suite apps?

- User errors and accidental deletions can hurt productivity
- Sophisticated ransomware attacks can hurt reputation
- Restoring data using G Suite archiving tools is cumbersome

Secure store your G Suite data on your cloud

SysCloud uses Amazon AWS, Microsoft Azure, and Google Cloud to encrypt and store your organization's data.

Restore data with a single click

Restore data directly to the user's account with folder structure and sharing permissions intact.

Get complete control on G Suite data

Define back and restore policies, receive alerts for violations, and define restore actions easily.

OFFICE 365 BACKUP TO KEEP YOUR BUSINESS GOING

Get the SysCloud enterprise-grade backup and the restore solution to secure Office 365 Email, OneDrive, and Sharepoint Sites so you can run your business with confidence.

Why should you backup Office 365 apps?

- User errors and accidental deletions are not protected
- Microsoft does not offer archiving or data hold features
- Restoring email data is cumbersome

Securely store your Office 365 data on the cloud

SysCloud uses Amazon AWS, Microsoft Azure, and Google Cloud to encrypt and store your organization's data.

Restore data with a single click

Restore data directly to the user's account with folder structure and sharing permissions intact.

Get complete control on Office 365 data

Define back and restore policies, receive alerts for violations, and define restore actions easily.
